

CLAIMS:

In the claims, please amend the claims as follows:

Claims 1-9 (cancelled)

10. (Amended) A vegetation integrated cover for a tool, which has a working portion and a handle extended therefrom, comprising:

a container, ~~comprising~~having a working cover portion

a base; and

a cover, removably coupled to the base, configured to cover the working portion

and the handle of the tool; and

~~a handle cover portion to cover the working portion and handle of the tool respectively;~~

~~and~~

a plurality of vegetation holders, designed to position vegetation on the ~~cover handle~~

~~cover portion to~~substantially hide the appearance and shape of the cover; and

wherein upon removal of the hidden cover, the working portion and the handle of the tool are exposed.

11. (Amended) The cover of claim 10, ~~where in~~wherein cover comprises a handle portion cover and a working portion cover, and wherein the vegetation holders ~~is are~~ designed to removably retain ~~the vegetation on a top section of the working cover portion cover and about the cover along the handle portion cover.~~

12. (New) The cover of claim 11, wherein the working portion cover comprises an inner and an outer ring attached to the top thereof, and wherein the rings include vegetation holders.
13. (New) The cover of claim 10, wherein the base comprises a cavity with a cavity lip protruding upwardly from the base, and configured to position the working portion of the tool in a central location of the base.
14. (New) The cover of claim 13, wherein the tool is a plunger.
15. (New) The cover of claim 13, wherein the tool is a toilet scrub brush.
16. (New) The cover of claim 14, wherein the plunger surrounds the cavity lip.
17. (New) The cover of claim 15, wherein the working portion of the toilet scrub brush fits inside the cavity.
18. (New) The cover of claim 10, wherein the cover comprises spacers positioned between the cover and the base, and configured to create an opening between the cover and the base to allow moisture to pass therethrough.

19. (New) The cover of claim 11, wherein the handle portion cover includes vapor holes to allow moisture to evaporate therethrough.
20. (New) The cover of claim 13, further comprising at least one moisture drain passing through the cavity lip to allow moisture to drain from cavity.
21. (New) The cover of claim 11, wherein the top of the working portion cover includes a layer of material designed to appear as dirt.
